## **ENVIRODRI** DRY CARPET CLEANING SYSTEM

[www.envirodri.com](http://www.envirodri.com)

INDEPENDENTLY TESTED AND  
CERTIFIED TO MEET THE HIGHEST  
STANDARDS OF PERFORMANCE &  
SAFETY

The top of the page features a photograph of a carpet cleaning machine. The machine is black with green accents. The brand name 'Envirodri' is visible in green on the side of the machine. The machine is positioned on a light-colored carpet that has some brownish stains. A green horizontal bar is overlaid on the right side of the image, containing the main headline in white text.

# CLEANER, FRESHER LOOKING CARPETS IN AN INSTANT

## WHY DRY CARPET CLEANING?

The Envirodri System is the work of over 25 years industry experience to develop a future-proof method that solves modern cleaning issues but also works across virtually any type of flooring – from sisal and coir to wool and synthetics.

Compared to traditional methods, the system was engineered with simplicity in mind. There is no requirement to fence off areas, close down rooms or fill solution tanks with litres and litres of water. Instead, Microsponges, which are millions of tiny, biodegradable fibres moistened with detergent, are spread across the floor and agitated in using the Envirodri GEN4 Dry Carpet Cleaning Machine.

As the Microsponges come into contact with soiling they break down and absorb it. These Microsponges are then vacuumed away to reveal a dry, clean, deodorised carpet that is ready for immediate use.

**A TRIED AND TESTED CLEANING METHOD WITH  
ZERO DRYING TIME: IDEAL FOR EVERY TYPE OF  
JOB ON EVERY TYPE OF CARPET.**

# THE ENVIRODRI RANGE

## GEN4 Dry Carpet Cleaning Machine

The Envirodri GEN4 Dry Carpet Cleaning Machine sits at the heart of the dry carpet cleaning process. With a 180° hinged handle allowing the operator to clean in even the most confined spaces, this self-propelling carpet cleaning machine glides effortlessly over floors, agitating in the dry cleaning compound whilst simultaneously lifting crushed carpet pile.

- Easy to use - No complicated controls or tools
- Suitable for both large and small spaces
- Self-propelling and lightweight
- Detachable handle for easy transportation and storage
- Water-free cleaning - no trailing pipes and hoses
- Carpets can be in use during and immediately after cleaning

The GEN4 Dry Carpet Cleaning Machine is supplied with all-purpose medium grade white brushes as standard. Other brushes of varying grade are also available for both soft and hard carpet types.

## Envirodri Microsponges

Our dry carpet cleaning compound offers a unique dual-purpose. Firstly to carry the cleaning agents and release them into the carpet, and secondly, to re-absorb as much dirt and soiling as possible. Made from a 100% biodegradable, natural fibre our Microsponges have been slightly moistened with a unique and balanced blend of cleaning ingredients chosen for their ability to dissolve and remove dirt.

Available in 1x10Kg Bucket, 2x10Kg Eco-Refill, 4x3Kg Buckets and 12x750g carry pouches. Fragrance options include Green Tea, Fresh Linen and Original Unfragranced.
